Cutting-edge manufacturing of identity documents

www.veridosmatsoukis.com

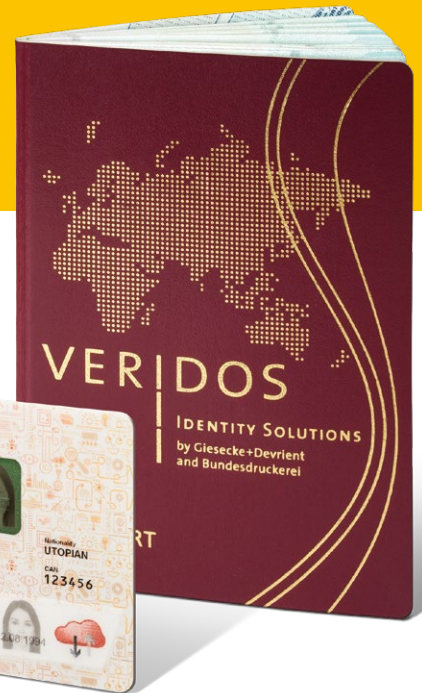

Greek company with family heritage

"At Veridos Matsoukis, we believe that when they join forces, extraordinary people can achieve extraordinary things. That's why our team is made up of individuals who are dedicated to providing secure identity documents to citizens around the world. We are driven by our passion for innovation and our desire to make a positive impact."

We take great pride in our fully integrated production process, which allows us to provide our customers with the necessary support and flexibility to produce highly secure identity documents. Our commitment to international quality and security standards ensures that our customers can trust in the reliability and safety of our products."

Dimitrios Matsoukis, Managing Director

Our identity

Today, over forty countries, including EU members, depend on Veridos Matsoukis S.A. for the production of passports, identity cards, driving licenses and other high security documents. The Greek company produces highly automated, both machine-readable and electronic passports, manufacturing about eight million state-of-the-art electronic passports each year.

Veridos Matsoukis S.A.'s manufacturing site in Greece offers the services and know-how for the production of high-quality modern travel documents. All facilities, procedures and employees comply with leading international quality and security standards.

In addition, the Greek National Defense ministry has certified Veridos Matsoukis S.A.'s 300 highly specialized staff to handle classified information at a national, NATO and EU security level.

The company's facilities are located at a 10,000 m² area in Ilion, Attica. Veridos Matsoukis S.A. harnesses cutting-edge technology to maximize production capacity and ensure impeccable standards for travel document quality and security.

Our history

In 1891, Veridos Matsoukis was set up as a small graphic arts studio, specializing in commercial printing. The Matsoukis family later shifted the company's focus to security documents. In the 1960s, the company signed its first contract to produce Greek passports, starting a long-term collaboration with Giesecke+Devrient GmbH (G+D).

In 2007, the German company acquired a majority stake and the joint venture Giesecke+Devrient Matsoukis S.A. was established. In 2015, the company became Veridos Matsoukis S.A. and continued to produce travel documents as part of the Veridos GmbH joint venture.

| VERIDOS MATSOUKIS S.A.

- A family-owned Greek company
- Founded in 1891
- Leader in the production of identity documents
- Partnership with Giesecke+Devrient GmbH since 2007
- Part of the Veridos network since 2015

The secret to our success

The production of our security documents resides on three core pillars: the combination of German and Greek technical expertise, decades of experience and in-depth market knowledge.

Veridos Matsoukis S.A. continuously monitors developments to add the latest in technological advances. The company's excellence is based on outstanding product quality, integrated production, as well as continuous research.

Mutual trust lies at the heart of what we do:

- Trust within all members of the Veridos network, reflected by the excellent, long lasting collaboration.
- With trust, we are building a strong bond between the leadership and the work force.
- And finally, trust between the company and its customers, who remain assured that they will be delivered a quality product on time.

Designing the future

Veridos Matsoukis S.A. monitors developments in the complex business environment, gearing up for an employee-centered future while continuously improving its products. For the immediate future, the company aims to further develop its solutions and at the same time systematically invest in its human resources through operational excellence and lean manufacturing.

Ultimately, thereby rendering the company an innovation center and contributing to Athens being an important technology hub in Europe. Research aims to apply new production methods and security features to make travel documents increasingly secure.

Going forward, the powerful partnership of Greek know-how and German technology will continue to win the trust of governments around the world.
